

- 1.Created 5 Classes :UserPage.java,AdminPage.java,Login.java,WebDriverLaunch.java,BaseTest.java.
- 2.In user page we are checking as an user whether the deleted product is showing or not.
- 3.In Admin Page we are deleting the product and verifying whether is is removed from Admin page or not.
- 4.In login Class, we are logging as admin.
- 5.BaseTest Class is the main class which is inheriting WebDriverlaunch Class and controlling the execution of all class by creating object of them and sending data from the properties file wherever its needed.
- 6.WebDriverLaunch class is used to initialize the browser and also loading the properties file.

## **Before Deletion of Product in Admin Page:**

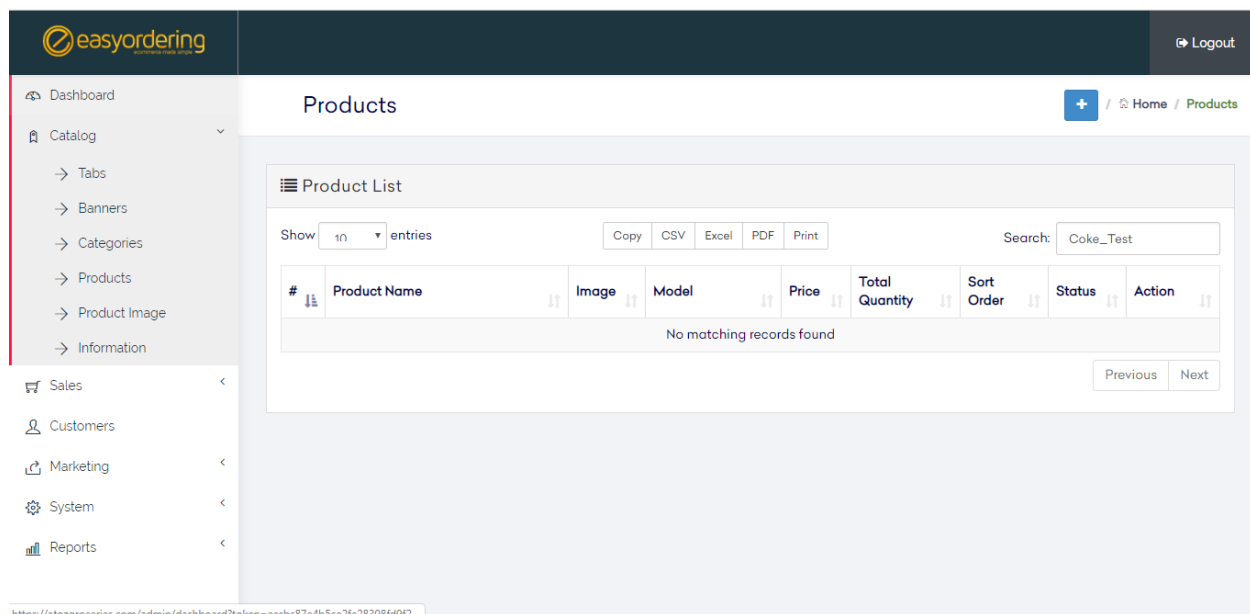

The screenshot displays the 'Products' section of the EasyOrdering Admin Panel. The left sidebar contains navigation links: Dashboard, Catalog (with sub-links for Tabs, Banners, Categories, Products, Product Image, and Information), Sales, Customers, and Marketing. The main content area is titled 'Products' and includes a 'Product List' table. Above the table, there are options to 'Show 10 entries' and buttons for 'Copy', 'CSV', 'Excel', 'PDF', and 'Print'. A search bar contains the text 'Coke\_Test'. The table has columns for '#', 'Product Name', 'Image', 'Model', 'Price', 'Total Quantity', 'Sort Order', 'Status', and 'Action'. A single product is listed: 'Coke\_Test' with model 'Coke\_008' and price '99.00'. The 'Status' is 'Enabled' and the 'Action' column has a dropdown menu. At the bottom right of the table, there are 'Previous', '1', and 'Next' pagination controls.

#	Product Name	Image	Model	Price	Total Quantity	Sort Order	Status	Action
1	Coke_Test		Coke_008	99.00	10	1	Enabled	Action ▾
